

VACUUM PUMPS

Depresser units

These long-proven depresser units are characterized by their performance, durability and high quality and finish. They are lubricated with SAE 10 oil. These depresser units include: vacuum pump, pulley, grease nipple, silencer, non-return valve, stainless steel base with belt tensioner, stainless steel belt protection, and vacuum tank. They can be supplied with or without motor and with a plastic or stainless steel vacuum tank according to the customer's preferences.
